3. [] Received a long distance call from Congressman Walter Judd concerning a film which he had seen about a month ago which was made by a Hollywood man who had made the film on Formosa using Chinese communist defector types to recreate the roles which they had actually played in selling communism in the Orient. Judd said he was impressed by this film and merely wanted to alert us to it if we did not already know about it. The man who made the film is Robert Ralsbeck who is currently at the Picadilly Hotel in New York City. Judd added that Ralsbeck has been in touch with USIA about the film. He has tried to have it produced in Hollywood but has been unsuccessful. In addition, Judd said that the NEW YORK DAILY NEWS might be interested in showing this film on television in the New York area at the time of Khrushchev's arrival next week. This information was passed on to [], OTR, who is looking into it.
